EDUCATION

NED University of Engineering & Technology

Bachelor of Science in Computer Science

None

October 2022 - June 2026

Highbrow College

Cambridge Education O/A Levels (Computer Science)

None

June 2018 - June 2022

EXPERIENCE

SayntAI

AI Automation Engineer

Pakistan

August 2025 - October 2025

- Built AI automation workflows using CrewAI, LangGraph, and AutoGen, resulting in enhanced creative and operational efficiency.
- Developed intelligent pipelines for logo generation and brand identity creation, showcasing proficiency in AI solutions.
- Designed agentic systems to automate content creation, demonstrating expertise in automation and AI-driven workflows.

Karachi Development Authority

IT Assistant

None

March 2025 - April 2025

- Assisted in maintaining IT infrastructure to ensure system efficiency and uptime, contributing to the smooth operation of government IT systems.
- Assisted in database management by organizing and updating digital records, ensuring data accuracy and accessibility.
- Collaborated with the IT team to document system processes and improvements, aiding in knowledge transfer and process standardization.
- Acquired hands-on experience in government IT operations and cybersecurity best practices, demonstrating a quick learning ability in a professional setting.

PROJECTS

Lead Generation and Enrichment | n8n, Apify, Airtable

- Used n8n & Apify to scrape Google Maps leads based on form input (industry/location), automating the initial lead sourcing process.
- Automatically extracted and cleaned key contact info (Email, Phone, LinkedIn, etc.) in n8n, streamlining data processing and enrichment.
- Filtered scraped leads, ensuring only those with valid email addresses were processed, improving data quality and relevance.
- Populated verified lead data into a designated Airtable base for CRM management, facilitating efficient lead tracking and follow-up.

AI PDF Chatbot using LangChain | OpenAI, FAISS

- Built an AI-powered chatbot that allows users to upload and query PDFs interactively, enhancing user engagement and accessibility.
- Integrated OpenAI APIs for language understanding and used FAISS for efficient document retrieval, optimizing chatbot performance and accuracy.
- Developed a seamless user experience for contextual question answering over uploaded documents, improving user satisfaction and information retrieval.

MCP Server for Expense Tracker | PostgreSQL, FastAPI

- Built an MCP-based server with API endpoints to add, update, delete, and summarize expense data, providing a robust backend for financial management.
- Integrated a PostgreSQL database for persistent storage and efficient financial analytics, ensuring data integrity and performance.
- Implemented summarization logic to automatically generate weekly and monthly financial insights, enabling data-driven decision-making.

AI Social Media Content Manager | *n8n, Google Gemini, OpenAI DALL-E*

- Architected an autonomous workflow to research, write platform-specific content, and create custom images, demonstrating innovation in content automation.
- Used n8n to orchestrate Google Gemini agents, SerpAPI for web research, and OpenAI DALL-E for images, showcasing proficiency in AI tool integration.
- Implemented a "Human-in-the-Loop" (HITL) Gmail approval system with a content regeneration loop, ensuring content quality and alignment with brand guidelines.

Autonomous E-commerce Fulfillment System | *n8n, PostgreSQL, Slack*

- Built a robust, 24/7 automation to manage e-commerce orders from webhook trigger to shipping notification, optimizing order processing efficiency.
- Engineered a two-loop system in n8n to first validate inventory against PostgreSQL before committing to fulfillment, preventing order errors and improving customer satisfaction.
- Designed an automated failure path that stops out-of-stock orders and instantly alerts the team on Slack, ensuring proactive issue resolution and clear communication.

TECHNICAL SKILLS

AI & Automation: Workflow Automation, Process optimization & automation strategy, Agentic AI development, LLM processing, Generative AI

Tools & Technologies: LangChain, LangGraph, n8n, make.com design & development, OpenAI, Claude, Google Sheets automation, Airtable, PostgreSQL, API design and management

Prompt Engineering: Prompt Engineering

Other: Documentation
