EDUCATION

NED University of Engineering & Technology

Bachelor of Science in Computer Science

None

October 2022 - June 2026

Highbrow College

Cambridge Education O/A Levels (Computer Science)

None

June 2018 - June 2022

EXPERIENCE

SayntAI

AI Automation Engineer

Pakistan

August 2025 - October 2025

- Developed intelligent pipelines for logo generation and brand identity creation, leveraging AI automation workflows using CrewAI, LangGraph, and AutoGen to enhance creative output.
- Designed agentic systems to automate content creation, resulting in streamlined workflows and improved efficiency in AI-driven marketing processes.
- Built AI automation workflows using CrewAI, LangGraph, and AutoGen for creative and operational efficiency.

Karachi Development Authority

IT Assistant

None

March 2025 - April 2025

- Assisted in maintaining IT infrastructure to ensure system efficiency and uptime.
- Assisted in database management by organizing and updating digital records.
- Collaborated with the IT team to document system processes and improvements.
- Acquired hands-on experience in government IT operations and cybersecurity best practices.

PROJECTS

AI Social Media Content Manager | *n8n, Google Gemini, OpenAI DALL-E*

- Architected an autonomous workflow to research, write platform-specific content, and create custom images, ensuring brand consistency across social media channels.
- Used n8n to orchestrate Google Gemini agents, SerpAPI for web research, and OpenAI DALL-E for images, automating the creation of marketing creatives.
- Implemented a "Human-in-the-Loop" (HITL) Gmail approval system with a content regeneration loop, maintaining high-quality and relevant content.

Lead Generation and Enrichment | *n8n, Apify, Airtable*

- Used n8n & Apify to scrape Google Maps leads based on form input (industry/location), enhancing lead generation efforts.
- Automatically extracted and cleaned key contact info (Email, Phone, LinkedIn, etc.) in n8n, improving the quality of leads for email marketing campaigns.
- Filtered scraped leads, ensuring only those with valid email addresses were processed, optimizing the effectiveness of CRM tools.
- Populated verified lead data into a designated Airtable base for CRM management, streamlining marketing automation processes.

AI PDF Chatbot using LangChain | *OpenAI, FAISS*

- Built an AI-powered chatbot that allows users to upload and query PDFs interactively, enhancing customer engagement and providing immediate support.
- Integrated OpenAI APIs for language understanding and used FAISS for efficient document retrieval, ensuring accurate and relevant responses.
- Developed a seamless user experience for contextual question answering over uploaded documents.

MCP Server for Expense Tracker | *PostgreSQL, FastAPI*

- Built an MCP-based server with API endpoints to add, update, delete, and summarize expense data.
- Integrated a PostgreSQL database for persistent storage and efficient financial analytics.
- Implemented summarization logic to automatically generate weekly and monthly financial insights.

Autonomous E-commerce Fulfillment System | *n8n, PostgreSQL, Slack*

- Built a robust, 24/7 automation to manage e-commerce orders from webhook trigger to shipping notification.
- Engineered a two-loop system in n8n to first validate inventory against PostgreSQL before committing to fulfillment.
- Designed an automated failure path that stops out-of-stock orders and instantly alerts the team on Slack.

TECHNICAL SKILLS

Marketing Automation: Workflow Automation, Process optimization & automation strategy, n8n, make.com design & development, Google Sheets automation, Airtable

AI & Machine Learning: Prompt Engineering, Agentic AI development, LLM processing, LangChain, LangGraph, Generative AI, OpenAI, Claude

Data Management & APIs: API design and management, PostgreSQL
